*Dear Friends,*

Thank you for your continued support of IASCO and our products.

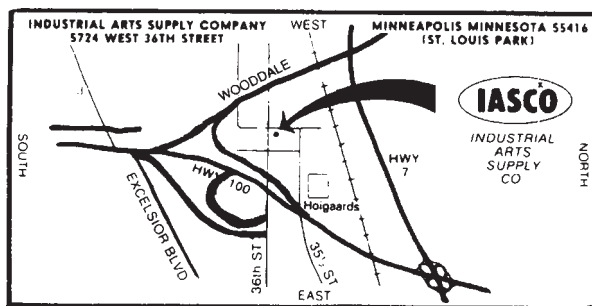

Please check out our new web site at [IASCO-TESCO.COM](http://IASCO-TESCO.COM).

We look forward to helping you with your instructional needs and look forward to a happy and healthy future.

Sincerely,

*Mike*

Michael Raymond, President

## 2-POLE DC MOTOR KIT

\$3.95

USES 1  
D CELL  
BATTERY  
NOT  
INCLUDED.

ALL THE PARTS, COMPLETE  
ILLUSTRATED INSTRUCTIONS,  
AND A TEST!

Teaches  
the basics of  
Electromagnetism,  
Armature Winding, Wiring,  
Commutator and Brush Assembly

### Basic electricity was never more fun than this!

#### *Personal Testimony*

When it comes to electric motors, and they are not the kind of thing you can avoid, a little bit of understanding about their design and operation can become helpful in life. [Almost] Everything I know about electric motors, I learned from a 2-pole IASCO motor kit. This is not to say that there was no further instruction on the subject, but additional information became reinforcement of the facts, building on the basic concepts learned clearly from an IASCO Motor kit. What exactly did that first encounter teach me about electric motors? Well, I'll tell you, and then my guess is you'll want to share this kit with every student you can reach. This stuff is that good!

Start at the beginning. **Simple circuits.** Rule #1: remove insulation from the ends of the wire. The why and where of insulation on wire is at the heart of basic electricity. Fail to grasp this concept and what happens? Experience is the best teacher. **Electromagnetism.** How simple is this? One wire, 2 connections, with the result of a demonstrable force phenomena that borders on magic. So cool, yet... There are only so many paper clips you can pick up before the magic begins to fade. Time to build a machine! Take the **basic wiring**, and the magnetic forces, and give them names as part of a greater design. Armature, Commutator, Brushes, and Poles, all combine to create a machine based on these elemental principals, assembled and adjusted by you, defacto master of the cosmic forces.

As the project comes together and small deviations from the basic rules of electricity are corrected and checked, the moment of truth approaches. Up till now, it's all been theory and conjecture. The power is applied, perhaps a gentle coaxing prod to the armature, and the creation springs to life. It's impossible to take your eyes off it's hypnotic allure, and best of all is the triumphant shout that rips unstoppable from the throats of student and teacher alike - "**IT WORKS!**"

# 99M BLOWTRON

*Onboard Inflation Compressor,  
Electronic Heat Control,*

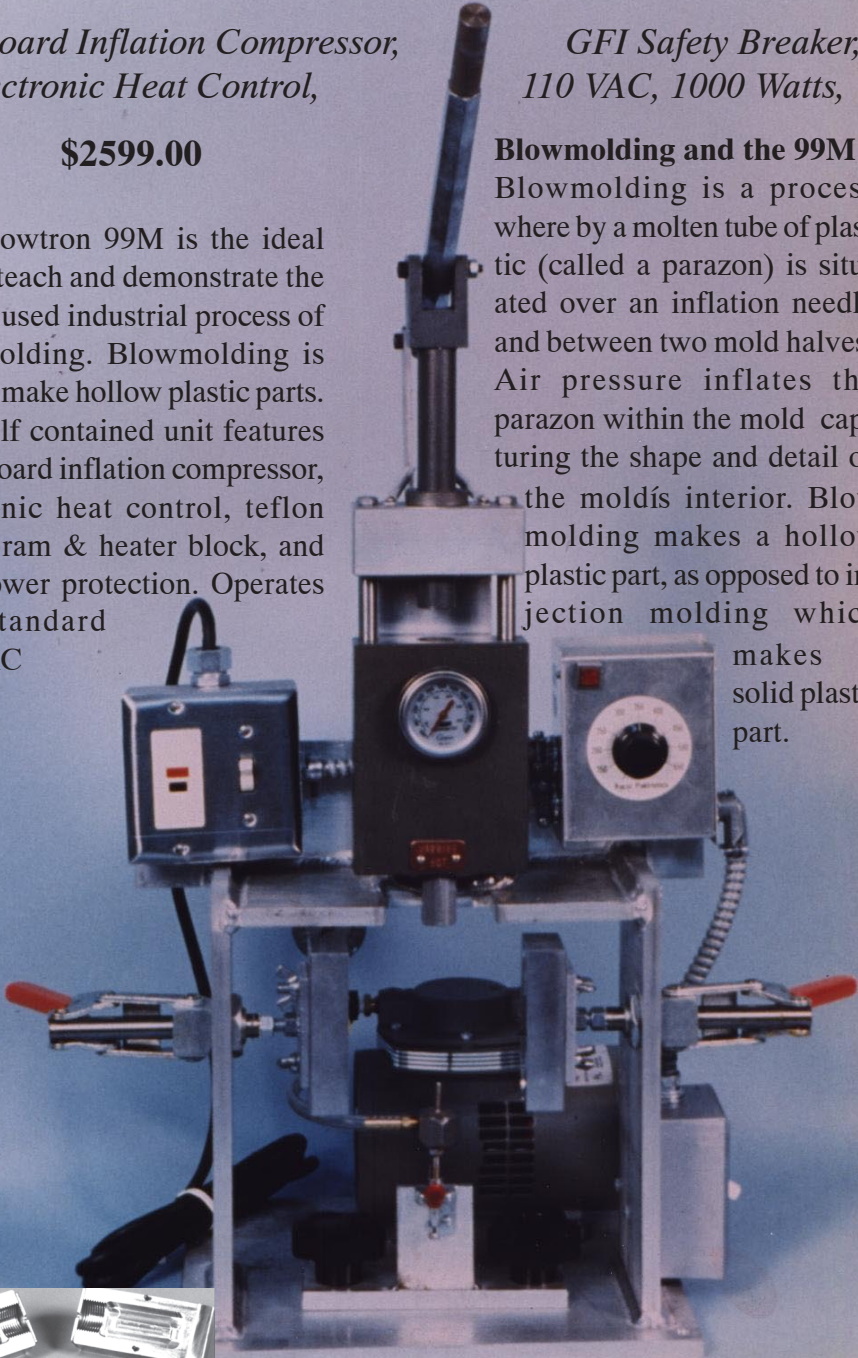

*GFI Safety Breaker,  
110 VAC, 1000 Watts,*

**\$2599.00**

The Blowtron 99M is the ideal tool to teach and demonstrate the widely used industrial process of blowmolding. Blowmolding is used to make hollow plastic parts. This self contained unit features an on board inflation compressor, electronic heat control, teflon coated ram & heater block, and GFI power protection. Operates on standard 110VAC

**Blowmolding and the 99M**  
Blowmolding is a process where by a molten tube of plastic (called a parazon) is situated over an inflation needle and between two mold halves. Air pressure inflates the parazon within the mold capturing the shape and detail of the mold's interior. Blow molding makes a hollow plastic part, as opposed to injection molding which

makes a solid plastic part.

*Teflon Coated Ram & Block*

## **Bottle & Cap Set #BM-2C \$189.00**

BM-2C Combines Blow and Injection Molding. Blow a hollow plastic bottle with threaded neck and Inject a threaded screw cap. Use LDPE only. Requires both injection & blow machines.

Molds for  
Blowtron 99M  
\$139.00 Ea.

**Jump Rope Handle #BMA-25**  
**Floating Key Tag #BMA-26**  
**Ball #BMA-27**  
**Rocket Nosecone #BMA-29**

# PLASTIC FOR MOLDING MACHINES

**Injection molding** requires pellets that roll into the machine.

**Polystyrene** pellets yield a rigid project.

**Polyethylene** is a translucent self lubricating plastic.

**Low density Polyethylene** is pliable and is used for projects that require some flexibility.

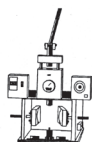

**High Density Polyethylene** is used for rigid projects that do not require flexibility.

**Polypropylene** has similar properties to polyethylene but is stronger.

<b>INJECTION MOLDING PELLETS</b>		
	\$18.99	\$169.00

Introduction to materials and terminology surrounding the vacuum forming process.

# Nichols Model 10-B Therm-O-Vac \$1399.00

## Self Contained Unit

The Nichols Model 10-B Therm-O-Vac is a free standing portable vacuum former that compacts to the size of a suitcase for storage and weighs 50 pounds. Set up time for the machine is less than 90 seconds and needs only to be connected to an available 110VAC standard outlet. A single 3-way switch operates both the plastic heating side and the vacuum forming side of the unit.

## Easy to Use

The versatile Nichols Model 10-B Therm-O-Vac is a snap to operate. Mount a sheet of high impact polystyrene plastic in the pivoting latch-lock frame, lay out your pattern on the vacuum platen, and cycle the machine to complete your project. The vacuum surface, unobstructed by the usual heating hood, allows you to rearrange or straighten your layout up to the final seconds before forming.

## Even-Heat Circulator

The Nichols Model 10-B Therm-O-Vac comes factory equipped with the Even-Heat option in place. The Even-Heat Circulator transforms the radiant heat of the element into a gentle zone of uniform temperature capable of processing unusually thin or reprocessed material.

## Favorite of Professionals

Everyone loves a star, and the Nichols Model 10-B Therm-O-Vac has earned its place in the prop shops and FX studios of several Hollywood Feature Films and TV shows. Rumored to be at the movie set of more than one Sci-Fi blockbuster for on the spot costume repairs and prop replacement the Nichols Model 10-B Therm-O-Vac is truly a professional instrument.

## Built to Last

Sturdy construction, baked finish, industrial quality parts, and a superior design combine to create a hardy workhorse for years of trouble-free operation.

## Large Size

The Nichols Model 10-B Therm-O-Vac uses styrene plastic sheets that measure 14 x 20 (280 sq. in.) x .020 to .060 thick. This is an extremely large capacity for such a modestly priced and compact unit. Adaptor unit is available to accommodate 9 sheet (10 x 7 #WZ-3) size to economize on material costs and enhance performance.

The Nichols Model 10-B Therm-O-Vac has proven indispensable as a tool for fast, efficient 3D modeling, prototyping, packaging, fabricating, and mold making. The Nichols Model 10-B Therm-O-Vac has a proven track record in the Tech-Ed Lab as safe and fascinating hands on machine for forming styrene plastic sheets over a variety of available vacuum forming molds. Due to the friendly, open design of the Nichols Model 10-B Therm-O-Vac, custom molds are exposed to reduced temperatures, greatly expanding the materials that may be used as molds or forms.

*Does NOT include machines*

Rotational Molding Kit #9 \$450.00  
Compatible with IASCO 110 roto oven.

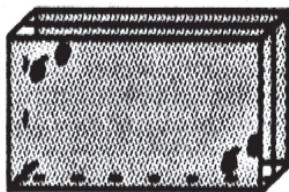

Kit #9: 25 lbs. LDPE Powder, 8 Oz. Fl powder pigment, 1 set hot mitts, Measuring set, # cast aluminum molds: 3.5" Ball, 5" Football, 6" Pig. Spray mold release. Simply Put Video: Rotational Molding.

Vacuum Forming Kit #7 \$450.00  
Compatible with 10-B Therm-o-vac.

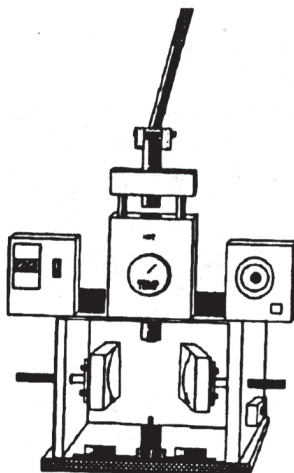

Kit #7: High impact polystyrene sheets 14" x 20" x .020 (25).  
PETG Visiform clear plastic sheets 14" x 20" x .020 (25).  
Vac Molds: Horseshoe/Horse, Football Helmet, 3/4" Gothic letters, 3/4" Gothic numbers.

Video: Simply Put: Vacuum Forming.

Mold Makers Kit #5 \$499.00  
16 BLANK Aluminum Molds measuring: 4" x 2.25" x 1".

These blanks are squarely pinned and finished on the exterior. Includes booklet on mold machining and cad-cam setup.

Blow Molding Kit #8 \$450.00  
Compatible with #99M Blowtron.

Kit #8: 25 lbs. LDPE pellets, 8 Oz. FL. powder pigment, Mold Set #BM-2C (requires injection molder for cap mold), Mold release spray, Needle nose pliers, Utility knife, Video: Simply Put: Blow Molding.

Injection Molding Kit #6 \$450.00  
Compatible with 66M, 75A, 110A.

Kit #6: screwdriver Handle Mold, 100 Screwdriver Blades, 25 lbs. LDPE Pellets, 25 lbs. Styrene Pellets. Front and rear dragster wheel molds. Needle Nose Pliers, Utility Knife. Vid: Simply Put: Injection Molding.

## PEWTER CASTING TOOLS

See page 34 for pewter

**2" HD Spring Clamps** #1919  
Extra heavy duty spring clamp used to hold silicone molds together during pouring. Best if used in pairs and in conjunction with #T-AP aluminum mold supports \$4.50

**Aluminum Mold Supports** #T-AP  
1 pair aluminum mold supports. Aluminum supports draw heat away from silicone mold and promote mold life. Easier clamping and crisper casts. \$3.25

**Flush Cutter** #662  
Trim sprue from your fresh casts closely and quickly with this handy miniature flush cutter. \$5.99

**Lee Ingot Mold** #1893  
4 cavity aluminum mold makes 2 ea 1/2 and 1 pound lead ingots. Includes wooden handle. \$16.00

Cyanoacrylate adhesive.  
Fast Bonding.  
#S-120..Thin  
#S-220...Medium  
#S-320...Thick

**Paint Markers- 5 pack \$11.99**  
Medium Tip, #PM5  
opaque - permanent acrylic paint marker. black, white, blue, red, green

## Balancing Bird

#7-1320...\$4.00  
This simple device demonstrates how gravity works. By perfectly distributing weight on the tips of the wings, and placing its mass near the tip of its beak, the equilibrium of the bird is stabilized. This allows the bird to balance on whatever object it is placed upon.

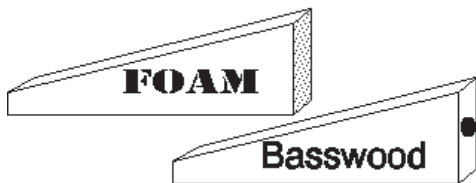

**Syringes without Needle**  
**Pack of 10.** Ideal for experimenting with hydraulics, pneumatics, fluid pressure and robotics.

# CO<sub>2</sub> DRAGSTER KITS

## LSRAV CO<sub>2</sub> KIT

LSRAV is our most popular complete kit. It includes all materials to design, construct and race a CO<sub>2</sub> powered dragster including a deluxe CO<sub>2</sub> cartridge.

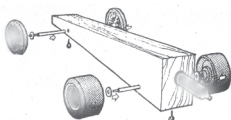

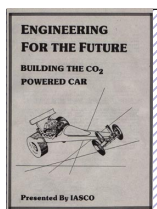

LSRAV KIT #LSRAV \$4.75  
 10 LSRAV KITS #LSRAX \$46.00  
 100 LSRAV KITS #LSRAC \$433.00

## METRIC STYLE DRAGSTER KIT

10 Kits #MD-2121  
 \$49.00

Deluxe kit includes all the parts.

Basswood body blank PLUS a student workbook!

## #1 RACER KIT

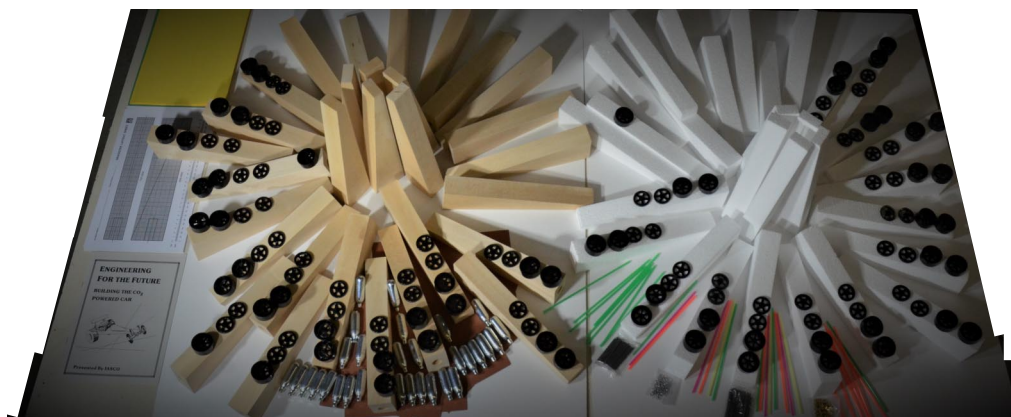

Everything but the body.

- 2 B style wheels
- 2 C style wheels
- 2 Axles (front & rear)
- 1 Co2 cartridge
- 2 Screw Eyes
- 4 brass washers
- 1 Straw

#NO1 single unit \$2.25 ea.

#NO2X ten pack \$21.33

#NO3C hundred pack \$200.00

## LSRAV KITS 30 TO A BOX!

CO<sub>2</sub> DRAGSTER BULK PACK

#02B-30

\$119.95

This handy bulk pack supplies the materials to construct 30 12" CO<sub>2</sub> dragsters. Components identical in quality and quantity to the popular LSRAV CO<sub>2</sub> powered dragster kit, only times 30. No little boxes are included, and we pass the savings on to you!

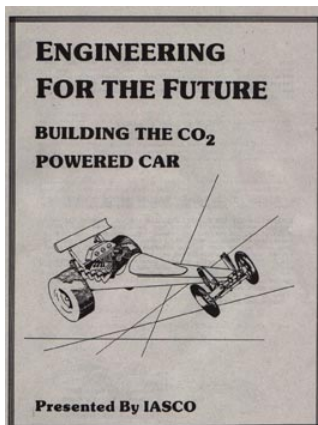

# DRAGSTER SUPPLIES & PARTS

**B PLUS**  
**RACING SLICK**  
 #BP-100 \$12.95  
 100 per pack

**C PLUS**  
**5 SPOKE**  
 #CP-100 \$11.50

## Co2 DRAGSTER LAUNCH SYSTEMS & ACCESSORIES

### SPEED GUN

# 450 \$149.00

Large LCD display. Displays fastest speed once trigger is released. Laser radar with +/- one mph accuracy. Requires 2 C batteries. 4.3 x 8.4 x 6 inches. Weighs 19 oz / 539g.

Measures the speed of a baseball at 10-110 mph from up to 80 feet away, and the speed of a race car from 10-200 mph at up to 1000 feet away. While trigger is pulled, radar will show changing speeds on display. Release trigger and the unit displays the fastest speed during trigger pull.

### DRAGSTER PAINT STAND

#DPS-050 - \$13.00

### Easy Racer Raceway

#OU-812 \$225.00

Pre assembled and adjustable, this affordable raceway covers the basic requirements to run your Co2 dragster class to its logical conclusion. **Starts 2 cars at the same time**, indicates the winning lane at the finish line. Safe and dependable construction.

### THE ELECTRONIC RACE SYSTEM

Metal Start gate shows LED times and Christmas tree start.

Two way adjustments for height and length insure fair starts.

Metal Start gate shows LED times and Christmas tree start.

B-740041

\$899.00

The starting alignment of both cars can be adjusted so shorter cars are not at a disadvantage. The winning lane and times of both dragsters show to the 1000th of a second at the start gate. No more running down to the break gate to get results!

Additionally, the Christmas tree start can be adjusted for a true reflex race or make it so reflex is not an issue by starting both cars when the start trigger is fired. There is even a mechanism to red light a car and not allow it to fire when the starting trigger is pushed before the green light comes on!

### Easy Racer Raceway

This simple to operate manual raceway is designed to launch two Co2 dragsters at the same time. A metal slammer bar is cocked and released, allowing the powerful spring action to impel the slammer in such a manner as to strike both firing pins at the same time. The firing pins may have to be replaced periodically due to wear. Replacements are available (**F-pin #OU-869 \$14.99 ea.**) or the entire housing/pin assembly may be replace due to loss or damage (**F-pin & housing assembly #OU-8PP \$27.99**). The Finish gate gently stops the cars (minimum track length: 60 yards) and indicates the winning lane. The Easy Racer Raceway is a great way to enter the world of CO2 dragsters on budget. Includes 1 spool race-line.

## ***OIL-BASED WOOD STAINS***

# AIRPLANE KITS

## Featuring the Award Winning Delta Dart!

### #510 DELTA DART \$45.99 35 pk.

The **DELTA DART** is the most popular teaching model airplane in the world. It features bi-lingual (English/Spanish) instructions and a time-tested unique construction method. Each box of 35 bulk packed kits contains a Teacher's Guide.

Wingspan: 290mm  
Fuselage Length: 295mm  
Propeller Diameter: 152mm

Power 7" loop of .062 rubber  
Weight: 13g  
Wing Loading: 00054g/sq in

### #509 SUPER DELTA \$69.99 / 24pk.

This kit features a removable, adjustable wing. A larger wing span for increased flight duration. Thicker balsa wood framing for improved durability. An improved construction manual to enhance the educational benefits and assure success.

Wingspan :545mm  
Fuselage Length: 380mm  
Propeller Diameter: 152mm

Power 12" loop of .062 rubber  
Weight: 18g  
Wing Loading: 00046g/sq in

### RIGHT FLYER #501-\$99.75/24pk. #50101-\$47.99/8pk. #50102-\$8.83/ea.

The big brother to the shoebox ROG, Right Flyer has cambered airfoil wings and a low thrust line for high performance.

Propeller Diameter: 152mm  
Power 12" loop of: .125 rubber  
Weight: 18g  
Wing Loading: 00043g/sq in

Wingspan: 485mm  
Fuselage Length: 380mm

### #51401 R.O.G. SHOEBOX \$34.99 /8pk.

Features:

Easy construction with complete instructions.  
Light but sturdy design. Flies 40 seconds or more in a gym or, over a minute outdoors.  
Easy to adjust wings for flying success

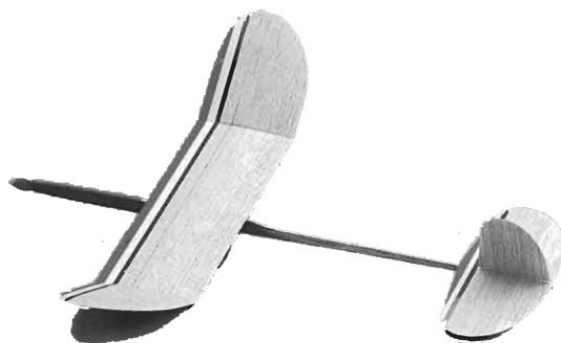

# AIRPLANE KITS

## Featuring the Award Winning Delta Dart!

### #502 FLIP GLIDER

**\$79.99/35pk.**

The Flip Glider features wing tip dihedral for stability, and an airfoil that your students sand to shape for optimal lift. This kit may be easily converted to an outdoor, catapult launched glider. 35 gliders per pack.

Wingspan: 310mm  
Fuselage Length: 300mm  
Propeller Diameter: 152mm

Power 12" loop of .093 rubber  
Weight 11g  
Wing Loading 00048g/sq in.

### #505 STAR GLIDER

**\$41.99 /35 double Kits.**

An economical first step in aviation science. 35 students are each supplied with two gliders to build.

# WHITEWINGS

**Whitewings  
30-Plane  
Competition Kit**  
Ideal for Science Class, Scouting, or Events!

Kit Includes:  
30 Sky Cub Racers  
30 sets of student instructions  
2 teacher's manuals  
Target Game.

**AG5000**  
**\$47.75**

# IASCO PLASTISOL

IASCO Plastisols are a high solids, vinyl dispersion formulation which exhibit high strength and stiffness at a hardness approximately equal to their part numbers as these numbers appear on the A Shore Durometer Hardness Scale. The uncured material in its original liquid state may be stored up to a year in a cool environment.

Caution: Do not burn plastisol or spill in oven. Smoke from burning vinyl is extremely irritating to eyes and lungs. Use aluminum tray or foil on bottom of oven to keep hot surfaces clean.

For use in aluminum molds:

- 1) **Pigment Plastisol** using IASCO opaque plastisol pigments in the ratio of 1-2 ounces pigment per quart of plastisol.
- 2) **For general casting** pour plastisol into cold aluminum mold - Don't spill in oven. Cook at 375°F for 20-30 min.
- 3) **For slush casting** pour plastisol into a preheated (400°F for 20 min.) mold and allow the plastisol to dwell in the hot mold for 90 seconds. The plastisol will solidify as it hits the hot metal, leaving a wall thickness of about 1/8". Pour out excess plastisol (back into the can) and post cure mold at 375°F. for 20-30 min.
- 4) **For rotational molding** pour into cold mold and make sure the mold does not leak. Process in a rotational oven for 30 min. at 375°F. Hand rotation is executed using a preheated mold (400°F. for 20 min.) and heavy duty hot mitts. Pour cold plastisol into preheated mold and quickly bolt together (careful - HOT). Rotate biaxially by hand for 5 min. and post cure 375°F. 30 min.

## Trouble Shooting Plastisol

**Problem:** Plastisol is brittle and tears easily.  
**Solution:** Brittleness is the classic symptom of under curing. Plastisol must be at temperature for sufficient duration to allow the vinyl cells to fuse completely. Exact cooking time will vary by situation. Never exceed 400 degrees F.  
**Problem:** Red pigment turns my plastisol pink.  
**Solution:** Uncured Plastisols 4, 16, & 65 are whiteish. Once material is cured it is neutral. The pastel influence will disappear as your project cures.

### Plastisol #97

**#97Q...\$14.99 / qt.**

**#97G...\$39.50 / gal.**

97 ( Shore A) Durometer. High solids content, very stiff finished product. The hardest plastisol available.

### Plastisol #65

**#65Q...\$15.99 / qt.**

**#65G...\$39.95 / gal.**

65 (Shore A) Durometer. #65 plastisol contains no barium or cadmium, instead it uses the FDA approved stabilizer Calcium-Zinc. Use plastisol #65 for any hot dip mandrill projects: Coin Purse, Ice Scraper.

### Plastisol #90

**#90Q...\$14.99 / qt.**

**#90G...\$39.50 / gal.**

90 ( Shore A) Durometer. High strength, stiff finished product.

### Plastisol #16

**#16Q...\$12.99 / qt.**

**#16G...\$35.99 / gal.**

16 (Shore A) Durometer. Great for bait molds. Very flexible .Remains soft in cold temperatures.

## Opaque, Transparent, and Flourescent

## Special note to our valued balsa customers

Market forces and Balsa prices:  
If you are on this page, chances are I do not have to tell you how great Balsa Wood is for strength vs. weight and ease of trimming. These are the properties that attracted the giant wind generator industry to balsa, and as a consequence, skewed the market by using up a significant portion of the raw material, creating a shortage and forcing the price to rise considerably. The solution: use Basswood instead. True, it comes in 24 instead of 36-inch lengths, but it is price stable, and strong.

## Laser engraving stock BALTIC BIRCH PLYWOOD

1/8 (3mm) x 12 x 24 # BBP-3  
PLY \$5.75 ea.

Beautiful BB/B grade Baltic Birch is ideal for laser engraving, CNC router, and precision scroll saw work.

## BRIDGE BUILDING KITS

EVERYTHING YOU NEED TO BUILD UP TO 25 BRIDGES.

BB-25A... **BALSA BRIDGE PACK**...\$109.00 (36"sticks)

BB-25B...**BASSWOOD BRIDGE PACK**...\$89.50 (24"sticks)

Classroom pack: let every student explore the basics of structural engineering. Included in the kit are 400 pieces of 1/8" x 1/8" x 36" (Balsa) strips or, 400 1/8 x 1/8 x 24 (Basswood), 25 student instruction sheets, 25 grid sheets, 2-16oz. bottles of white wood glue, 25 empty glue vials with caps, 25 single edge razor blades, 50 toothpicks for glue, 1 Bridge design and construction booklet.

## PEWTER CASTING

### LEAD FREE PEWTER #LFP-37

\$19.99 / LB.

Use for most pewter / jewelry applications. This material has a great silvery shine and is not too brittle. Contains Tin (97%), Antimony (2%), Copper (1%). The best of all our metals!

### LEAD FREE CASTING METAL

#LFM \$21.50 / LB.

Tin. A malleable, silvery metallic element obtained chiefly from cassiterite. It is used to coat other metals to prevent corrosion, and forms part of numerous alloys, such as soft solder, pewter, type metal, and bronze. Atomic number 50, atomic weight 118.69, melting point 231.89C. High detail in all casting projects.

### ROYAL CROSS PEWTER

#RC-1652 \$21.75 / LB.

**LEAD FREE.** A specialty pewter for making useful objects such as spoons, thimbles, goblets, gears, and letter openers. Royal Cross Pewter is hard, silvery, and casts well. 95% Tin, 4% Antimony, 1% Copper. A formula based on the pewters of historic England.

DELUXE CASTING METAL #DCM-12 \$14.66/ LB.

(CONTAINS LEAD) Great looking, lead based, high tin ornamental casting metal. Compatible with metal or high temp. Silicone molds. Not for making toys. Tin 60%, Lead 34%, Antimony 6%.

CASTING METAL # CM-18 \$9.99 /LB.

(CONTAINS LEAD) casting metal for hard, clean castings. Tin 10%, Lead 82%, Antimony 8%.

99% LEAD #CM-99 \$6.99

**Screwdriver Handle Mold for Pewter** #CA-01  
Aluminum mold for casting a pewter handle around a 1/8" dia. Screwdriver blade. Excellent project! \$84.95

**Corn Holder Mold for Pewter** #CA-11  
Aluminum mold for casting ergonomic handles for hot corn on the cob. Uses 2 small nails. \$84.95

### Lee Precision Melter

#1903 \$49.95

4 lb. (lead) capacity electric melter

with thermostat. Suggested pewter setting 5.2 - 5.7 for silicone molds. 110vac, 500W.

### Economy Pouring Ladle

#1907 \$9.95

Lightweight and easy to use with generous capacity to fill most molds in a single pour. The perfect companion to the 1903 Lee Lead Melter.

### Hot Pot 2 - melter

#1892 \$55.00

Electric ladle melts and pours from a single unit. Cast iron pot holds 4 lb. Lead (3.4 lbs pewter). 120vac. 500W.

### Production Pot IV #1901

\$79.95

An efficient bottom pouring furnace originally designed for melting lead and pouring directly into molds such as the sinker/jig gang style molds. Clearance under spout is about 4". 110vac, 500W.

See page 15 for Lee ingot mold

# SUPER GLOSS

*Create a smooth and seamless plastic coating over countertops, tables!*

## Clear tabletop resin

**Gallon Kit**  
(1/2 gallon  
each A & B)  
**\$59.99**

**2 Gallon**  
**Kit \$109.00**

Super Gloss copolymer resin is a 2 part extra thick coating that flows beautifully over flat or round surfaces. Mix equal parts well in a clean container and apply with a brush or flood directly on to your project. Before the resin starts to cure, remove all the trapped air bubbles by treating the surface with a loose flame from a hand held propane torch. If the open flame makes you squeamish, a heat gun, hairdryer, or for small projects just blow through a straw, all the bubbles disappear. Keep your project in a warm, dustless environment for a tack free finish in 12 hours. After about 72 hours, the surface may withstand light use. Super Gloss is UV stable to resist yellowing and crazing. IASCO resin pigments may be used to tint Super Gloss from its original clear appearance. Due to the excellent chemical resistance of Super Gloss, several non-standard applications have met with success. Try Super Gloss to create a seamless, waterproof liner for darkroom sinks. Taxidermists and naturalists love Super Gloss for preserving specimens and simulating water.

Super Gloss is not recommended for outdoor applications.

## BRIDGE BUSTER KIT

**#BBK-63 \$49.99**

Test the bridges you design and construct from balsa or basswood with the finished product from this unique kit. The BRIDGE BUSTER KIT consists of heavy duty steel parts that you assemble and mount to any 3/4" plywood base.

A procenium style assembly with all the fittings to accommodate the threaded rod of downward force that slowly, incrementally, with inexorable progress, adds more and more weight to the bed of your artfully constructed engineering masterpiece. You provide the scale of your choice and plywood base.

Kit contains:

- 2 steel vertical braces
- 1 horizontal top piece  
with threaded mount
- 1 threaded rod with handle
- 1 Instruction book

An extremely sturdy device for testing bridges made of basswood, balsa, toothpicks and macaroni.

# GLUE GUNS / GLUE STICKS

# Snap Circuits

## SC-300R...\$103.95

*R =Includes: Student Manual and Teachers Guide*

The model SC-300 contains over 60 modular snap together parts that will allow students to build over 300 experiments. With an easy-to-read color manual, students can jump right in and start building projects that teach about motors, batteries, lamps, speakers, resistors, capacitors and switches

**Also available as:SC-300...\$63.95**

\*Does not include Student Manual or Teachers Guide\*

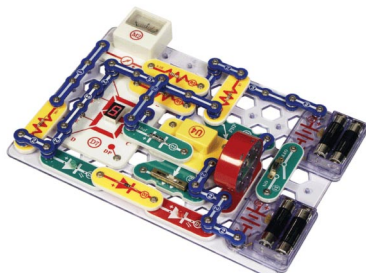

## SC-500R...\$154.95

*R =Includes: Student Manual and Teachers Guide*

The model SC-500 contains over 75 modular snap together parts that will allow students to build over 500 experiments in electricity and electronics. The full color project book will make it a snap to construct projects related to transformers, relays, 7-segment LED displays, transistors and diodes. Also learn about series/parallel circuits, AM/FM radios, resistance and capacitance.

**Also available as:SC-500...\$94.95**

\*Does not include Student Manual or Teachers Guide\*

## SC-750R...\$199.95

*R =Includes: Student Manual and Teachers Guide*

The Model SC-750 contains over 80 modular snap-together parts that will allow you to build over 750 experiments in electricity and electronics. Full-color project book to construct projects related to transformer, relays, generators, solar power, 7-segment LED displays,

**Also available as: SC-750...\$129.95**

\*Does not include Student Manual or Teachers Guide\*

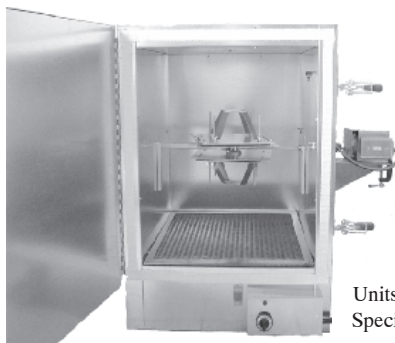

**Model 110#RO110...\$2100.00**

The model 100 oven is used with the rotational unit. Specifications:  
Dual rotational unit. Steel gear drive mechanism. Two universal mold holders. Ten RPM high torque 110 volt gear motor. Quick disconnect mold holders. The rotational unit may be removed from the oven so the oven may be used for other applications.

Inside dimensions  
18"x15"x15"

Rating 110 volts,  
1000 watts

Units available with forced air fan option,  
Specify: With fan option and add \$275.00

**Model 210 #RO210...\$2275.00**

The model 200 oven is used with the rotational unit. Specifications:  
Dual rotational unit Steel gear drive mechanism. Two universal mold holders. 10 RPM high torque 110 volt gear motor. Quick disconnect mold holders. The rotational unit can be removed from the oven in seconds so the oven may be used for other applications.

Inside dimensions  
20"x22"x22"

Rating 110 volts,  
2000 watts

Imprintable puzzles give you the freedom to create durable and mountable wall art out of your favorite photos and images. Not only can they be set with glue, framed and hung, but they can be also utilized for fun and personalized games! The gloss, white surface is ideal for vibrant sublimation printing results. Great for personalized gifts or just for crafty fun!

# HEAT PRESS & T-SHIRTS

## Geo Knight

9" x 12"

## Digital Swinger JetPress

**#JP12...\$399.00**

The JetPress 12 machine is a light duty, economical heat press perfect for the small-scale hobbyist. This heat press is ideal for ink-jet transfer paper, laser transfer paper, copier and sublimation iron-on transfer paper.

The JetPress 12 provides an amazing heat press for professional quality imprinting results, without the costs associated with commercial heat press equipment. The JP12 features a digital countdown timer, adjustable temperature control and temperature readout and adjustable pressure. This small heat press can apply several hundred pounds of clamping force with the minimum of operator effort. It provides far better pressure and temperatures than what a hand iron can deliver, at a fraction of the time.

## POLYSTYRENE

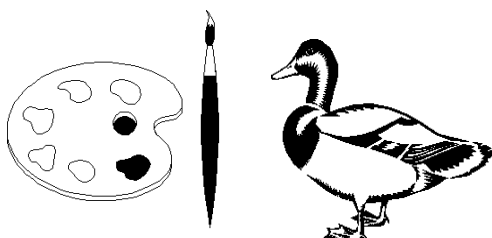

### EXPANDABLE BEADS

These beads have a limited shelf life of 6 months. Refrigeration is recommended to extend the shelf life.

**Polystyrene expandable beads** are imbued with a gas content at the factory. This harmless gas expands when heated. In the process of expansion the brittle styrene bead fractures internally. The net result is a white styrene foam with flotation and impact resistant properties widely used in industry for protective packaging. Expandable beads are shaped into useful objects by containing the expanding bead in an enclosed metal mold. At 200°F the gas causes the catastrophic fracture while at around 205°F the surface of the bead begins to melt and become sticky. This sticky surface in combination with the expansion within the enclosed mold results in formation of a solid block of foam. Boiling water is the preferred expansion method since it does not exceed 212°F. Oven expansion in an imprecise oven may actually overheat and liquefy the entire bead mass which would defeat the desired result by collapsing the foam.

# INJECTION MOLDING MACHINES

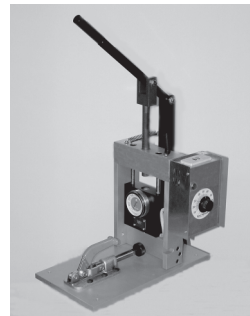

## *The Most Popular Injector for Middle School*

### **#66M Manual Injection Molder \$1294.00**

A simple to use unit for demonstrating the process of hands on injection molding. Use IASCO pellets of styrene, polyethylene, or polypropylene to manufacture a wide variety of solid plastic objects from our precision machined aluminum molds.

Features: Over-center mold clamp, Teflon coated ram & heater block. GFI safety switch. Electronic heat control. 1 year limited parts & labor warranty. Capacity: 2/3 ounce. Power: 110 VAC.

Includes: Purge block, Filler tool, Operation Manual, Wooden shipping crate.

### **#75A Technotron \$2259.00**

#### **3/4 ounce Air Powered Injection Molding Machine**

Industrial quality components through out, precision construction and user friendly controls make this unit an exceptional value. 110vac, 700 watts.

Specifications:

Capacity - 3/4 ounce

Compatible Plastics - Use IASCO 110VAC - 700W

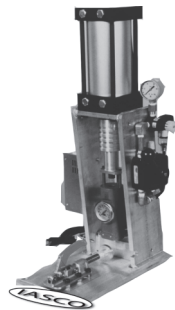

Polystyrene, Polyethylene,  
or Polypropylene pellets

Mold size: 4 x 2.25 x 1

Air Input - Quick Disconnect

Electronic Heat Control

Regulator - 2 lbs./click

## #TD-8

**TranDye...8pk....\$14.40**

### Transparent EZ-CAST Dyes

Colors; Red, Green, Yellow, Violet, Orange, Gold, Blue, and Pearlescent. Bottle size: 6 dram.

### HOW TO: CATALYST

1) Add 12 drops per ounce or approx. 10cc catalyst per quart of resin.

2) Mix well.

3) Apply Catalyzed resin with natural bristle brush, roller, or spray.

4) Remember: **GEL TIME is 5-9 minutes.** Resin application must be completed before gel occurs.

# RESIN

*Catalyst furnished free*

## WW1 Resinal With Wax

#WW1-100 GAL: \$48.95

IASCO best grade polyester resin for shop and marine use. Use where a tack free finish is desired. Great for boats and cars. Directions: add 12 drops of catalyst per ounce of resin. Mix only as much as can be applied in 5-9 minutes. Mix well and apply with natural bristle brush (throw away) or roller. For best results use at 77°F.

*Catalyst furnished free*

## WOW2 (With Out Wax)

Polyester Resin

#WOW2-A \$45.99 /Gal.

Wax free resin requires less surface prep between laminations.

Identical in formulation to WW1, except wax HAS NOT been added as a surfacing agent.

This allows successive layers to be laminated without the need for sanding or strong solvents as a surface prep.

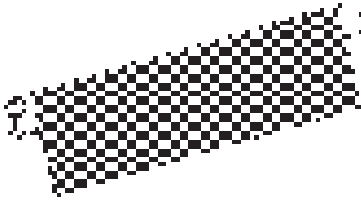

## EXTRA CATALYST

MEKP CATALYST - 2 oz. \$4.00

For polyester resins and gel cotes.

# FIBERGLASS

## KEYLAR CARBON FIBER

Resins (polyester or epoxy) by themselves offer little in the way of strength, flexibility, or impact resistance. It is ONLY when combined with fiber reinforcement that these desirable properties become evident. Through the process of fiberglass lamination structural integrity, waterproofing, and superior strength to weight ratios may be accomplished while creating unique as well as traditional configurations. As you laminate, strive for a high glass content to your lamination. Always test your technique on a small sample before undertaking large projects. The weight of fiberglass cloth is measured per square yard while the weight of fiberglass mat is measured per square foot. As with any yard goods, measure twice - cut once.

## Release Agent for Polyurethanes

**Camie 980**  
**#980...\$16.90**  
**18oz.**

980 is a silicone release agent that is useful for rigid polyurethanes, epoxies, polyesters, TPR and other thermosetting resins.

No CFC or ODS

Use with EuroCast and Almond EuroCast. Works with most urethane foams and elastomers (Such as Por-a-Mold) on silicone, latex, metal, and polyurethane molds.

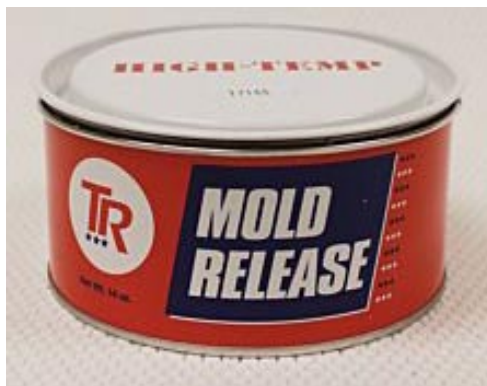

**STONER**

**STONER #S236 \$16.99**

Aerosol release for silicone molds when casting Eurocast.

Urethane Mold Release, Stoner S236 is specially formulated as a top quality release agent and anti-stick lubricant for molded urethanes and similar materials. Provides fast, easy part removal from molds and multiple part releases per application. Improves molding efficiency in many processes including injection, pour cast, and extrusion molding; light coating produces best results

## WAX RELEASE FOR FIBERGLASS

**Hi-Temp Wax #TR104 14 oz. can \$19.75**  
 This high quality paste wax will yield many mold cycles producing high gloss parts. A favorite of many high volume production shops.

**PARTALL Paste Wax #2**

**# PW-2 \$17.99**

This wax is primarily used in pattern-mold making and on the edges of production molds. A very effective release on a variety of substrates. A must when making non-gelcoated parts or molds. Made by Rexco, their tech department has excellent literature on application and trouble shooting. To be used in concert with Partall/E Coverall Film, 1.5 pound can.

**#WX \$2.50**

The most important release is from your worktable! Work on a fresh piece of wax paper and avoid soak through spills. Cover surfaces to protect from overspray. **Wax Paper 12" x 75' roll.**

# RESIN FILLERS

## 3M Micro Balloons

#3MMA...1 Quart...\$8.95

Low density filler for resins. These tiny glass bubbles impart impact resistance and sand ability. A good non-moisture bearing filler for polyesters, epoxies and even some polyurethane resins. Density 5 pints per pound.

## Cab-O-Sill

#COS1..QUART \$7.25

Universal thickener compatible with most polyester, epoxy and gel cote resins. May also be used to thicken Latex mold making material. Mix 50/50 with balloons and add to resin to make a creamy paste.

## Chopped Fiberglass

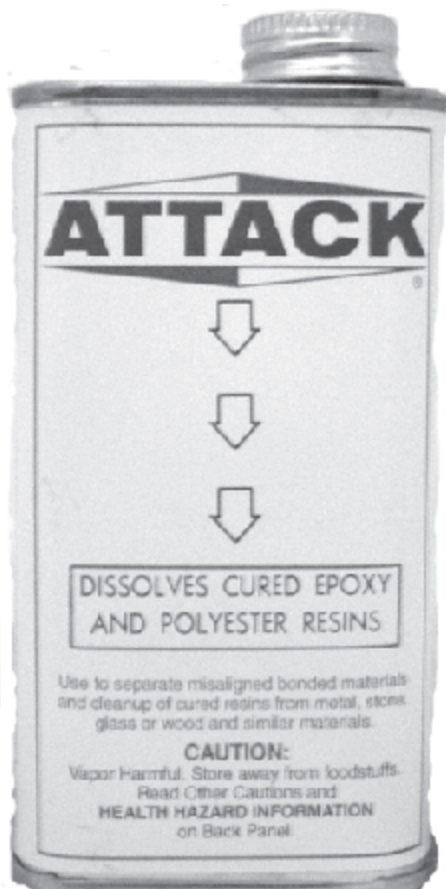

#CFS1...Quart...\$6.75

1/4 inch long strands add more strength then powders to your resin.

## Ground Fiberglass

#GFP1...Quart...\$9.00

Pure powdered fiberglass, free of clumps. Mixes well with resins to make a hard patching compound.

## Attack

#AK-80

8oz. \$11.99

Dissolves/Softens cured polyester and epoxy resins.  
Reclaim ruined tools!

## China Bristle Brushes

Size	Part #	\$ Each	Part #	\$ Dozen

# SPRAY MOLD RELEASE

**Product #:** 45712N \$7.99  
**Pure Eze Mold Release**  
**11.5-Oz.**

**Description:**

Non-silicone paintable. An excellent all-purpose release. Neutral white-oil-based release. No lecithins. Won't turn color or turn rancid. Use with all thermo plastic resins, polyolefins, polycarbonates, rubber and some epoxies.

expandable  
beads

**Product #:** 44312 \$9.95  
**Slide Silicone Water-Based 12-Oz.**

**Description:**

CFC-free and chlorine-free. No VOC's. Biodegradable. Colorless and non-staining. The E/S Formula is a breakthrough in mold release technology and is the most effective release known for most mold and plastic applications. Works well on molds 130°F. and above.

Blow Molding

**SLIDE DURA-KOTE**  
**#41712 \$9.99**

Solvent-free dry formulation  
 Semi-permanent release for urethane & epoxy molding  
 Curable silicone oil (can be baked or air dried onto the mold surface)

Paintable when baked on  
 Excellent mold release for rotational molding  
 Maximum operating temp:  
 600F / 315C

**Product #:** 40510 \$6.75  
**Slide Econo-Spray 1 (14-oz.)**

**Description:**

Non-paintable silicone. No ozone depleting chemicals. No methylene chloride. No chlorofluorocarbons (CFC's). Contains a highly effective, non-paintable silicone fluid in a chlorinated solvent carrier system. It will give an excellent release with all thermoplastics, but is not recommended for polycarbonates. Pretest on all resins.

**Product #:** 40112N \$9.99  
**Slide Silicone Mold Release 12-Oz.**

**Description:**

FDA Approved lubricant. No ozone depleting chemicals. Faster molding and more production. Eliminates rejects. Heat stable and non-toxic. Approved for food machinery. Lubricates.

## EZ-Cast in glass or ceramic molds

**Product #:** 42612 \$10.99  
**Slide Universal Mold Release 12-Oz.**

**Description:**

Non-silicone paintable. No ozone depleting chemicals. FDA approved lubricant. Use where parts must be painted, hot-stamped or metalized. Biodegradable and odorless.

**Product #:** 40710 \$6.99  
**Econo-Spray 2 (14-oz.)**

**Description:**

Paintable. No ozone depleting chemicals. No methylene chloride. No chlorofluorocarbons (CFC's). Econo-Spray 2 is a paintable release in a chlorinated solvent carrier system. It permits post-decorating of molded parts without prior cleaning. Pretest on all resins.

## EZ-Cast in Poly Molds

**Product #:** 41212N \$9.98  
**Slide Silicone Free**

**Water-Soluble Mold Release**  
**Description:**

Non-silicone paintable. No ozone depleting chemicals. Permits ultrasonic welding of parts. No removal necessary. Does not contain water. Water Soluble release permits complete cleaning of molded parts with water.

**Product# 45812H \$7.99**  
**Slide Urethane Mold Release**

**Description:**

For rigid, semi-rigid and flexible urethane foams, Release Oil designed especially for polyurethanes, Non-paintable silicone formulation, non-marking, no chlorinated solvents.

# EUROCAST

## ODOR FREE CASTING RESIN

This is a fast setting, high detail polyurethane casting resin that is absolutely odor free.

Simply mix the two components equally in a cup and stir for 20- 30 seconds, and then pour into your mold. Demold in 15 minutes.

Eurocast may be colored using our plastisol pigments (add pigment before combining eurocast components). Eurocast may be sanded, drilled, and machined once it is fully cured. Always use adequate ventilation when using any urethane. Shelf life in unopened cans is about 3 months.

Color: white

### Featured Project: Giant Clothes Pin.

Suggested applications:

Anatomical models, anthropological replicas, clocks, electronic potting compound, foundry patterns, graphics models, jigs and fixtures, miniatures, pistol grips, taxidermic replicas, toy models, training aids, vacuum forming molds, wall plaques wood carving reproductions.

**Eurocast Quart kit (1 pint ea. A&B)**

**#EU-32 \$19.95**

**Eurocast Gallon kit (2 qt. ea. A&B)**

**#EU-28 \$73.95**

# ALMOND EUROCAST

## OIL FREE PAINTABLE SURFACE

Almond Eurocast is a fast setting, high detail polyurethane casting resin. Use it as you would standard white Eurocast, with a one to one ratio for quick setting low odor casting projects. Almond Eurocast is a warm tan in color making it an ideal base for models as well as simulated ivory or bone carvings.

Strong and machinable, with a hardness of 70 (Shore D), Almond eurocast presents an oil free surface that is ideal for post cure painting. Almond Eurocast may be pigmented using IASCO plastisol pigments (in moderation) to create an imbedded color scheme conducive to a highlighting or antiquating processes. Always use adequate ventilation.

Featured Project: Giant Clothes Pin

Shelf life in unopened cans is about 3 months, do not freeze.

**Almond Eurocast Quart kit**

**(1 pint ea. A&B) #AU-32 \$18.95**

**Almond Eurocast Gallon kit**

**(2 qt. ea. A&B) #AU-28 \$56.50**

# EUROCOLOR

## NEW EUROCOLOR PIGMENT FOR EUROCAST CASTING RESIN

Super dense EUROCOLOR pigment for Eurocast and Almond Eurocast may be applied up to 5% for best effect. Add to light side of Eurocast/Almond eurocast before combining the 2 part urethane components. As always mix well and stand back! Working time of eurocast is very short, but so is the cure time. Demold in as little as 15-20 minutes.

4 ounce bottles. \$12.95 ea.

Black (#XT41), Brown (#XT42), Green (#XT43), Green (#XT44), Orange (#XT45), Red (#XT46), Yellow (#XT47), Blue (#XT48)

## Giant Clothes Pin Project

**Objective:** Demonstrates the basic procedure of resin casting.

**Materials required:**

Giant Clothes Pin poly mold # PMB-13

4 ounces casting resin

paper measuring cup

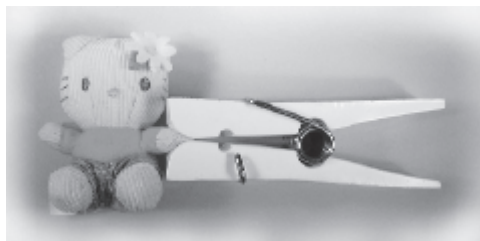

stir stick (box of 1000 #CS-1000)

BS-55 giant cloths pin spring

Safety glasses or goggles

Eurocolor pigment for Eurocast

Disposable gloves

### Procedure:

- 1) Level poly mold to ensure a complete fill to both cavities.
- 2) Prepare to mix and pour either of the Euro resins immediately after combining the two components. If you are adding pigment, add it to one side in the cup first, before adding the other side of the 2 part system. Euro resins set up FAST and you only have about 30 seconds to stir (furiously) with the stick before you must pour carefully into the mold.

- 3) Into the paper measuring cup pour a total of 4 ounces of resin (2 ounces A plus 2 ounces B - Eurocast or Almond Eurocast)

**or**

- 4 ounces EZ Cast and 12 drops per ounce of MEKP hardener {48 drops total per 4 oz.}.

- 4) Mix well and pour into mold, filling both cavities evenly and completely. Each cavity is 2 ounces exactly, so if you overfill one you will be short on the second.

- 5) Resist the temptation to poke, jiggle, or move the castings in the mold until they are completely cured. (5-10 minutes for Euro resins, up to 4 hours for EZ Cast).

- 6) Demold, sand sharp edges, and mount the two halves in the BS-55 brass spring.

## Pump-Poxy 2.0

*New Improved* **Pump-Poxy 2.0** is ideal for cedar strip canoes, Sailboats, and projects that involve laminating fiberglass to wood or fiberglass.

New ratio of 2:1 can be hand measured or conveniently pumped precisely for ease of application.

### Pump-Poxy 2.0

Medium Viscosity Epoxy Resin and non-blushing 2:1 hardener.

3 hour working time.

**IASCO**  
**E-Z-CAST CLEAR**  
**CASTING**  
**POLYESTER RESIN**

**# EZR-G GALLON CAN / includes 40cc Catalyst \$55.99**

Water Clear casting resin for art, craft, scientific preservation, and commercial applications. Pre-promoted for a tack free finish. No special equipment required. IASCO E-Z-CAST can be poured in layers up to 1/2" thick for embedment. Compatible with polyethylene, polyurethane, latex, and silicone molds. Shrinkage is approximately 6%, but this may vary considering catalyst ratios and mass variations. Great for taxidermy, jewelry, potting, and museum applications. IASCO E-Z-CAST may be tinted with transparent pigments from the IASCO 8 PACK TRANSPARENT DYE SET, or pigmented with Resin Pigment.

Use 12 drops of catalyst per ounce of E-Z-CAST when poured at 1/4" thickness.

Shelf life when stored in a cool, dry place: 4-6 months. Catalyst shelf life: 3-5 months.

**TECHNICAL DATA**

Specific Gravity: 1.13

**IASCO**  
**MASS CAST CLEAR**  
**CASTING**  
**POLYESTER RESIN**

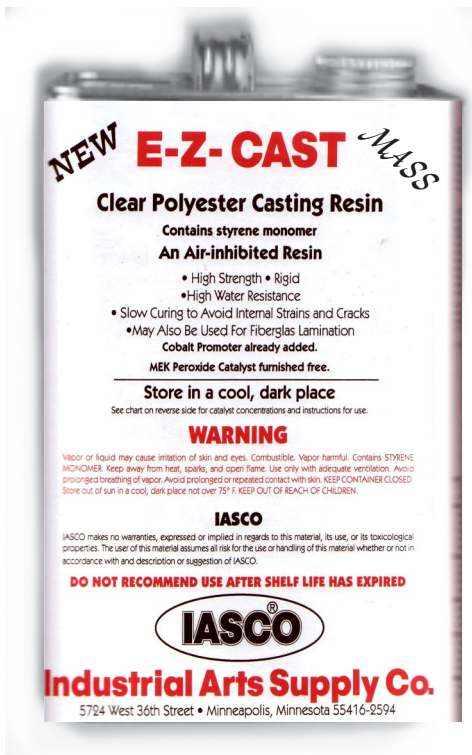

# E-Z-M-G

**GALLON CAN / includes 40cc Catalyst \$56.95**

IASCO MASS CAST is a water clear casting polyester resin formulated to withstand the high heat and stress of thick section cure. It is possible to achieve thick section cure up to 8 inches cubed. The key to success with MASS CAST is in the catalyst ratio. Too much catalyst, and the part will crack and burn (polyester resins can generate up to 330 F. at peak exothermic reaction), too little catalyst, and the surface will remain tacky.

**Guidelines for catalyst ratio (77F):**

1" thick pour - 10 drops catalyst per ounce of MASS CAST; 2" thick pour - 6 drops catalyst per ounce of MASS CAST; 3" thick pour - 5 drops catalyst per ounce MASS CAST; 4" thick pour - 4 drops catalyst per ounce of MASS CAST.

**HELPFUL HINTS**

**FOR WORKING WITH IASCO  
E-Z-CAST AND MASS CAST RESINS**

Optical clarity in a clear casting may be influenced by 1) surface texture, 2) air entrapment, or 3) embedment contamination. To achieve the maximum clarity possible, your mold surface must be smooth. Textured or rough surfaces may "frost" the surface and diminish clarity. Plate glass makes an excellent molding surface. Technique is the best way to reduce air entrapment. Pour the resin out of the can, and allow it to sit for about an hour, to liberate any trapped air. Then, add the proper amount of catalyst (12 drops catalyst per ounce of resin at 1/4" thick {E-Z-Cast}, or 4 drops catalyst per ounce at 4" thick {Mass Cast}), and stir GENTLY, minimizing any agitation that will reintroduce air into the mix. Pour gently into mold. For superior management of air bubbles, a pressurized chamber is used. An increase of 25-50 psi will create an environment that can not support a bubble in the resin. Pressure must be maintained throughout the cure cycle. Parting advice: Always use release agent, run a test sample, work with fresh material only, avoid contact with catalyst.

## RTV SILICONE RUBBER

### High Temp Silicone Rubber

#RTV-9120

**\$79.99 / 2 lb. kit**

RTV 9120 can be used to make molds for low temp metals such as lead free pewter. Pourable liquid cures at room temperature. Finished molds can withstand temps upto 600 degrees F. for short periods of time. 3120 has an (A Shore) durometer hardness of 60. Tensile strength is 600 PSI. Catalyst Included - 10:1 by weight.

#RTV E110

**\$77.99 / 2 lb. kit**

Two pound kit. A shore durometer hardness of 35. Finished molds can stand temps of 500F for very short periods of time. Tensile strength of 700 PSI, and elongation of 400%. Tear strength die B, 90 PPI.

#RTV-9110

**\$59.99 / 2 lb. kit**

Two pound kit. Pourable two part silicon that cures at room temperature (77F). Works well on patterns with unusual configurations, severe undercuts and close tolerances. Finished molds withstand temps from -85 to 392 F. (Shore A) 45 durometer hardness. Tensile strength is 400psi and elongation is 180%. Tear strength, die B is 15 PPI. Working time 2 hours. **NOT FOR METAL CASTING.**

## Polishing and Scratch Removal Kit

#1106001...\$4.99

Designed for edge polishing or to restore clarity to scratched acrylic surfaces. Kit contains Craftics 20/20 polish, super soft polishing cloth, sanding block, 150 grit and 600 grit sandpaper.

## Drill Bits

Especially for plastics.

60 degree rake, no shoulder

1/8" #DB1/8 \$2.75

5/32" #DB5/32 \$3.55

3/16" #DB3/16 \$3.55

7/16" #DB7/16 \$8.99

1/2" #DB1/2 \$11.25

## Wax Based Modeling Clay

#MC-1801 \$4.95 per pound

Non-toxic never dries. Compatible with RTV silicon rubber and liquid latex

## QUICK-SIL

#5000 \$67.00 2 lb. kit

## RELEASE CREAM

#5001 \$9.50 1oz.

## MOLD CLAY

#4000 \$4.50 1 lb.

Quick-Sil is a two part silicon rubber putty that is mixed by hand and produces tough, long lasting molds. Handles temperatures up to 900 degrees F. Zero % shrinkage, sets up in as little as 15 minutes and is surprisingly flexible. Great for jewelry molds and projects with fine detail.

## ACRYLIC TOOLS

## Acrylic Edge Scraper

#1106020...\$8.65

Acrylic Edge Scraper features 4 tools in one. It remove saw marks from acrylic edges, bevels thick and thin material, and will radius an edge quickly and evenly.

## Heavy Duty Plastic Cutter

#1106531 \$9.87

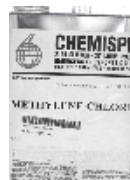

For scoring acrylic sheet.

## Swivel Blade Plasticutter

#1106087...\$2.95

Hardened steel blade scores and cuts acrylic up to 1/4" thick. Swivel blade folds.

## Methylene Chloride

#MC-128...Gal...\$59.00

This adhesive is non-flammable and may also be used as a solvent for cured epoxy and polyester resin. Use in a well ventilated area as with all acrylic cements.

## General Purpose Welders Glove

#GWD-WELD...\$11.99 pr.

Gray, standard leather, lined.

# ACRYLIC PLASTIC

Sheets measure 12" x 24" for a total of 2 square feet

## GM GRADE COLORS

1/8" ...\$11.50  
3/16" ...\$13.00  
1/4" ...\$15.98

### Transparent

Available colors: Red, Blue, Yellow,  
Green, Gray, Bronze, Amber

**#3-04..4 oz...\$6.25**

**#3-16..16oz...\$12.99**

**#3-128..Gal...\$73.00**

### Terminology Review

#### GM Acrylic:

Cell cast acrylic sheet, high melt point (400°F) so it resists heat better during cutting and machining operations. Upside: Beautiful colors, easy to fabricate. Downside: Handmade, cast one sheet at a time. Higher cost, inconsistent dimensions.

#### FF Acrylic:

Fabricating grade extruded sheet. Medium melt point (around 275°F) so cutting is slower, machining may require coolant as in metalwork. Upside: Lower cost, consistent thicknesses, can't tell the difference from GM by looking at it.

#### MC Acrylic:

Extruded via the melt colander process, MC is also a fabricating grade acrylic. It is extremely close to FF in melt point (260°F.?) So all the same fabricating tricks that work with FF to avoid overheating will serve you well with MC. Upside: Bargain price, nice colors. Downside: Slower to cut and polish.

#### Transparent:

You can read a newspaper through it.

#### Translucent:

Allows light to filter through, but not an image. Lightboxes, bathroom windows.

#### Opaque:

Does not let any light through.

#### Fluorescent:

Makes rough edges or frosted engraving appear to glow. Electric colors.

## BUFFING COMPOUND

### Special White

#NW-02...big bar...\$15.00

Best for buffing casting resins, fiberglass, acrylic and epoxies.

**Tripoli #TP-01 2-1/2 lb \$14.50**

The plastic buffing compound for use on muslin buffing wheels. Gives a fine finish.

**White Diamond #WD-01 bar \$14.25**

White in color and cleaner to use than tripoli.

**Polishing Rouge #PR-01 1/2 lb. \$4.90**

Wet look high lustre finish.

### Adhesive Applicators

#AP-01...1oz...\$2.59

#AP-02...2oz...\$2.79

#AP-04...4oz...\$2.99

### Drill Bits

Especially for plastics. 60 degree rake, no shoulder

1/8" #DB1/8	\$2.75	5/16" #DB5/16	\$5.49
5/32" #DB5/32	\$3.55	3/8" #DB3/8	\$7.89
3/16" #DB3/16	\$3.75	7/16" #DB7/16	\$8.99
1/4" #DB1/4	\$4.95	1/2" #DB1/2	\$11.25

### 20/20 Plastic Cleaner

#1106021...8oz..pump...\$6.00

#1106018...Gal...\$24.00

Anti-static cleaner repels dust.

### 20/20 Plastic Polish

#1106377...8oz...\$6.00

Unsurpassed in removing fine scratches, haziness and abrasions from most plastic surfaces.

### Novus #2 Plastic Polish

#NOV-2...8oz...\$6.49

Medium duty scratch remover. For best results follow with Novus #1 Cleaner. Reduces abrasions, haziness and fine scratches.

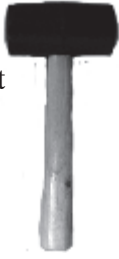

### Novus #1 Plastic Polish

#NOV-1...8oz...\$5.49

Cleans and glazes plastic surfaces in one easy step. Leaves a glaze that resists finger marking and dust build up. Also acts as a anti-static.
